

Covid 19 Creates Immediate Investment Opportunity

Remote Wearable Technology to Combat Covid 19!

Fort Worth based Wearable Device Technology company unveils physical therapy and monitoring device for home and in-clinic use to combat Covid 19

MedHab LLC is seeking an immediate cash infusion to ramp up supply chain and manufacturing of it's lead products steprite® and MyNotifi®. The immediate need is \$2M, and the cash will be used to: fill supply chain, manufacture 5,000 steprite® and 1,500 MyNotifi® devices. Restrictions on tele-medicine have been lifted and providers now have a reimbursement opportunity to manage patients remotely.

Driving the Market Need for remote patient monitoring and tele-medicine

- *In November 2019, Medicare approved new CPT codes allowing providers to be compensated and incentivized to use remote patient monitoring*
- *On March 3rd 2020, Medicare appropriated \$500M for remote patient monitoring to combat Covid 19*
- *On March 13th 2020, the Trump Administration announced a Covid 19 plan, to include the appropriation of \$50B. Tele-health is a significant part of the plan.*
- *On March 13th 2020, the Texas Medical Board released a plan to reduce regulations and increase the ability for providers to use remote patient monitoring and tele-health*
